POSTERS ON THE HILL

30 Visual Representation of Africans in 18th and 19th Century Art & Literature in England & France
31 Structure & Function of the Esophagus in the American Alligator
32 Petrographic Study of the Emplacement of the Alta Stock, Brighton, Utah
33 Understanding the Formation of Air Pollutants Through Kinetic Pathway Analysis
34 Carbon Dioxide as a Carbon Source
35 Biosynthesis of Natural Antimicrobials from Plants: Benzophenone Synthase
36 The Role of the Hippocampus in Spatial Pattern Completion
37 A Comparison of Microwear Analysis & Stable Carbon Isotopes to Reconstruct Prehistoric Fremont Indian Subsistence
38 Temporal Neuronal Development of the Nematode C Elegans
39 Design of High-Performance Concrete to Build a Concrete Canoe
42 Vitamin A and Protein Analysis in Cerebrospinal Fluid
43 Premature Lambs with Chronic Lung Disease have Decreased Fetal Liver Kinase-1 Protein
44 Optical Diagnostic Probe for Combinatorial Screening
45 Effects of Surface Conduction on Rib Tubulators
46 ‘Spanglish’ as a Hybrid Language: An Approach in Cyberspace
47 The Zebrafish Olfactory System with a Novel Transduction Pathway for Polyamines
48 Collaborative Remote Visualization
49 Gene Therapy by Preparing Adenovirus Vectors
50 Molecular and Functional Characterization of SCAMP in the Drosophila Nervous System
51 The Role of DNA Repair Enzymes in Cancer Prevention
52 Modeling Complex Combustion Chemistry
